SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript (ES6+), SQL
- **Web & Backend Technologies:** Spring Boot, RESTful APIs, Angular, Node.js, Express.js, HTML5, CSS, Tailwind CSS, Bootstrap
- **Databases:** MySQL, MongoDB, PostgreSQL
- **DevOps & Deployment Tools & Version Control:** CI/CD, Docker (basic), Jenkins, AWS API Gateway, Jira, Azure, Git, GitHub Actions, Nginx
- **Development Tools:** Postman, Swagger, IntelliJ IDEA, Visual Studio Code, HeidiSQL, Maven, Gradle
- **Concepts:** Object-Oriented Programming (OOPs), Data Structures & Algorithms (DSA) with Java, Design Patterns, SDLC, Agile Methodology, MVC, Microservices, Hexagonal Architecture, JWT Authentication, OAuth 2.0, Spring Security, Hibernate, Unit Testing (JUnit, Mockito)

WORK EXPERIENCE

Fives India Engineering & Projects Pvt. Ltd.

Software Engineer

04/2025 - Present

- Developed secure **RESTful APIs** using **Spring Boot**, applying **Hexagonal Architecture**, **OAuth2**, and **JWT** authentication, while optimizing **MySQL/MariaDB** queries and backend modules for high performance and maintainability.
- Migrated legacy systems to a modern **Angular** and **Spring Boot** stack, implementing **state management** with Store, Actions, Selectors, Signals, enhancing UI reactivity, data consistency, and scalability.
- Optimized **backend service** layers and **SQL queries**, built with **Gradle**, improving response time by **30%** and increasing code quality using **JUnit** and **Mockito** for **unit/integration testing**.
- Implemented **CI/CD pipelines** using **Jenkins**, **Git**, **GitHub Actions**, covering frontend dependency installation, linting, testing, builds, and deployment. **Deployed** frontend via **Nginx** and backend with **Gradle**, ensuring automated and reliable production releases.

Graduate Engineer Trainee

04/2024 - 03/2025

- Developed a full-stack application with **Node.js**, **Express.js**, and **MySQL**, initially using **HTML**, **CSS**, and **JavaScript** for the frontend, streamlining backend service orchestration and **API efficiency**.
- Migrated the application to a modern full-stack architecture using **Spring Boot**, **Angular**, **Maven**, and **Yarn**, enhancing scalability, maintainability, and frontend performance, resulting in improved user engagement.
- Applied **CI/CD automation** using **Jenkins** and GitHub Actions for consistent builds and deployments. Streamlined frontend delivery through **Nginx** configured with **JDK 21** and automated unit testing, linting, and build steps to ensure stable and predictable deployments.
- Collaborated with cross-functional teams in an **Agile environment**, contributing to multiple projects while demonstrating accountability, adaptability, and continuous learning.

EDUCATION

Kongunadu College of Engineering and Technology

B.Tech Information Technology - 8.72 CGPA

June 2019 - Apr 2023

PROJECTS

Inventory & Supply Chain Management System

01/2025 - 03/2025

- Designed and implemented a **backend** Inventory & Supply Chain Management System using **Spring Boot** and **MySQL/MariaDB**, creating **REST APIs** for products, warehouses, suppliers, and stock management.
- **Automated stock movement** and low-stock alert processes with scheduled backend jobs, ensuring timely inventory updates and preventing stock shortages.

Alumni Connect Portal

09/2024 - 12/2024

- Developed a full-stack Alumni Connect Portal using **Angular** and **Spring Boot**, implementing secure **authentication**, CRUD APIs for alumni and events, and **role-based access** control to enhance engagement and maintainability.
- Integrated advanced frontend **state management** (Store, Actions, Signals) and **search/filter functionality** to improve data flow, user experience, and **responsiveness** for both administrators and alumni.
