SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript (ES6+), SQL
- **Web & Backend Technologies:** Spring Boot, RESTful APIs, Angular, Node.js, Express.js, HTML5, CSS, Bootstrap
- **Databases:** MySQL, MongoDB
- **DevOps, Deployment & Version Control:** CI/CD, Docker, Jenkins, AWS, Jira, Git, Nginx
- **Development Tools:** Postman, Swagger, IntelliJ IDEA, Visual Studio Code, HeidiSQL, Maven, Gradle
- **Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA) with Java, Design Patterns, SDLC, Agile Methodology, MVC, Microservices, Hexagonal Architecture, JWT Authentication, OAuth 2.0, Spring Security, Hibernate, Unit Testing (JUnit, Mockito)

WORK EXPERIENCE

Fives India Engineering & Projects Pvt. Ltd., Chennai

Software Engineer

04/2025 - Present

- Developed secure **RESTful APIs** using **Spring Boot**, applying **Hexagonal Architecture**, **OAuth2**, and **JWT** authentication, while optimizing **MySQL/MariaDB** queries and backend modules for high performance and maintainability.
- Migrated legacy systems to a modern **Angular** and **Spring Boot** stack, implementing **state management** with Store, Actions, Selectors and Signals to enhance UI reactivity, data consistency, and scalability, along with frontend unit testing using **Angular TestBed**.
- Optimized **backend service** layers and **SQL queries**, built with **Gradle**, improving response time by 30% and increasing code quality using **JUnit** and **Mockito** for **unit/integration** testing.
- Implemented **CI/CD pipelines** using **Jenkins** integrated with **Git/GitHub**, covering frontend dependency installation, linting, testing, builds, and deployment. **Deployed** the frontend via **Nginx** and the backend with Gradle, ensuring automated and reliable production releases.

Graduate Engineer Trainee

04/2024 - 03/2025

- Developed a full-stack application with **Node.js**, **Express.js**, and **MySQL**, initially with an **HTML**, **CSS**, and **JavaScript** frontend, streamlining backend service orchestration and **API efficiency**.
- Migrated the application to a modern full-stack architecture using **Spring Boot**, **Angular**, **Maven**, and **Yarn**, enhancing scalability, maintainability, and frontend performance, resulting in improved user engagement.
- Applied **CI/CD automation** using **Jenkins** and **GitHub** for consistent builds and deployments. Streamlined frontend delivery through Nginx configured with **JDK 21** and automated unit testing, linting, and build steps to ensure stable and predictable deployments.
- Collaborated with cross-functional teams in an **Agile environment**, contributing to multiple projects while demonstrating accountability, adaptability, and continuous learning.

EDUCATION

Kongunadu College of Engineering and Technology, Trichy, TamilNadu

B.Tech Information Technology - 8.72 CGPA

June 2019 - Apr 2023

PROJECTS

Inventory & Supply Chain Management System

01/2025 - 03/2025

- Designed and implemented a **backend** Inventory & Supply Chain Management System using **Spring Boot** and **MySQL/MariaDB**, creating **REST APIs** for products, warehouses, suppliers, and stock management.
- **Automated stock movement** and low-stock alert processes with scheduled backend jobs, ensuring timely inventory updates and preventing stock shortages.

Alumni Connect Portal

09/2024 - 12/2024

- Developed a full-stack Alumni Connect Portal using **Angular** and **Spring Boot**, implementing **auth security**, **CRUD APIs** for alumni and events, and role-based access control to enhance engagement and maintainability.
- Integrated advanced frontend **state management** (Store, Actions, Signals) and **search/filter functionality** to improve data flow, user experience, and responsiveness for both administrators and alumni.

Personal Portfolio Website

05/2025 - 06/2025

- Personal Portfolio – Responsive HTML/CSS/JS site showcasing my work, deployed on Netlify.
